Product Description

- **WATER LEVEL DETECTION:** Accurately senses and monitors water levels in tanks, reservoirs, RO , Water Coolers and other liquid containers.
 - **FLOAT MECHANISM:** Uses a reliable buoyancy-based float design to trigger automatic switching as water levels rise or fall.
 - **DURABLE CONSTRUCTION:** Built with sturdy, corrosion-resistant plastic housing that withstands prolonged exposure to water
 - **EASY INSTALLATION:** Features a threaded fitting for quick and straightforward Side mounting on to tanks without specialised tools.
 - **VERSATILE USE:** Suitable for overhead water tanks, RO , Water Coolers sumps, aquariums, and industrial liquid storage applications.
-
